PROJECTS

❖ BankEase: The Bank Management System

Project Description: Designed and developed a modular Bank Account Management System, emphasizing scalability, flexibility, and easy maintenance. Implemented a user-friendly software framework to accommodate future expansions and modifications, ensuring efficient system operation and adaptability to changing banking requirements.

❖ Sign Language Conversion into Text for D&M

Project Description: To address the needs of the approximately 46 million people worldwide who are unable to speak or hear, we propose the development of an English Sign Language application. This application aims to facilitate communication and the sharing of thoughts for individuals with physical challenges. By utilizing hand gestures, the proposed application will enable meaningful interaction between these individuals and others in their community.
